

AHNJILI ZHUPARRIS, PHD

New York & Netherlands | +31650415612 | artificialnouveau@gmail.com | www.artificialnouveau.com

AI engineer, artist, and science communicator exploring data, AI, and surveillance technologies to push boundaries and provoke discussion on predictive policing, voice and identity, digital surveillance, and Afrofuturism.

SKILLS

Programming:	Python, R, Javascript
Machine Learning:	Computer Vision, Generative AI, Voice Cloning and Analysis
Languages:	English, Mandarin (B1), Dutch (B1)

EDUCATION

Leiden University, Netherlands <i>Doctor of Philosophy (PhD) in Medicine (with a focus on applied AI)</i>	2020 - 2024
Radboud University Nijmegen, Netherlands <i>Research Master's Degree in Cognitive Neuroscience</i>	2015 - 2017
University of Edinburgh, United Kingdom <i>Biomedical Bachelor's Degree with Honours in Neuroscience</i>	2011 - 2015

TEACHING

Teacher - Hogeschool voor de Kunst Utrecht (HKU) Courses taught:	2022 - Present
Introduction to Deep Fakes <i>University of Arts London (UAL), IMPAKT festival (Netherlands)</i>	2023 - Ongoing
Introduction to Generative AI in Videos <i>Artez University of the Arts (Netherlands)</i>	2023 - Ongoing
Introduction to Computer Vision-Based Surveillance <i>Hogeschool voor de Kunst Utrecht (HKU) (Netherlands)</i>	2022 - Ongoing

AWARDS, GRANTS & FELLOWSHIPS

Stimulerings Fonds: Fresh Perspective	Netherlands, 2024
Processing Fellowship: Screen-to-Soundscape	USA, 2024
Constant Fellowship: Technodisobedience	Belgium, 2024
Mozilla Creative Media Awards: Future Wake	USA, 2021

FUNDED ART PROJECTS, RESIDENCY & EXHIBITIONS

DEEPFAKE: An Interactive Video Essay	2025
A short visual essay and interactive installation (premiered at Peckham Digital Festival 2025). Used participants' facial and vocal data to generate personalized narratives on authenticity, identity, and synthetic media.	
Screen-to-Soundscape	2024
A creative approach to reimagining screen reader voices, developing a speculative prototype that transforms a browser into an immersive soundscape. Funded by Constant, the Processing Foundation, and the Stimulerings Fonds.	
Fashion Police Drones	2024
Transforms drones into arbiters of fashion, inviting the audience to set criteria for fashion norms. Presented at the New Media Arts Conference at the CICA Museum.	
VOICES	2023
An interactive installation where participants record a secret. Their voice is processed and cloned by Machine Listening algorithms. Supported by IMPAKT, ARS Electronica, and the European Festival Fund for Emerging Artists (EFFEA).	
Future Wake	2021
An interactive art project (futurewake.com) that turns predictive policing upside down, allowing citizens to predict police brutality using machine learning and deepfake algorithms. Awarded by the Mozilla Creative Media Awards.	
Field Trip: Synthetic Biology Documentary	2013
Contributed as editor for a documentary exploring synthetic biology, examining how scientists treat DNA as programmable code and cells as systems built of genetic circuits.	

PUBLICATIONS

Wevers, R. (2024) Embodying Data, Shifting Perspective: a conversation with Ahnjili Zhuparris on Future Wake. In: Doing Digital Migration Studies. Edited by Ponzanese, S. and Leurs, Koen. Amsterdam: Amsterdam University Press.

Selected Projects Portfolio

artificialnouveau@gmail.com • artificialnouveau.github.io\$ **SELECTED PROJECTS**>> [2025] **DEEFAKE: A VIDEO ESSAY**

A critical video essay examining the cultural and emotional impact of deepfake media – from AI-powered memorials to non-consensual pornography. Presented alongside a live installation featuring real-time deepfake technology. Produced by Artificial Nouveau Studio, videography by Flora Reznik.

[vimeo.com/1082448682]

>> [2023] **VOICES AT ARS ELECTRONICA**

An interactive installation inviting participants to co-create a sound-art composition with their voice. Participants record a secret and are guided through the processing, analysis, and cloning of their recordings by Machine Listening algorithms. Exhibited at Ars Electronica and IMPAKT Festival.

[youtube.com – VOICES at Ars Electronica]

>> [2021] **FUTURE WAKE**

Mozilla Creative Media Award winner. An interactive website that turns predictive policing upside down, allowing citizens to predict police brutality. Uses machine learning to forecast fatal police encounters and deepfake algorithms to generate the faces of potential victims.

[www.futurewake.com]

>> [2014] **SYNTHETIC BIOLOGY: A NEW CODE FOR LIFE**

A documentary exploring the emerging field of synthetic biology, where DNA is treated as programmable code and cells as genetic circuits. Covers a decade of advancements while raising ethical questions about the definition of life and the boundaries of genetic engineering.
